SIGG: A STRONG BRAND TO SUPPORT YOUR BRAND MESSAGE

The history of SIGG in Switzerland dates back to 1908 when metal-processing specialist Ferdinand Sigg established an aluminum product factory in Biel. Sigg and his colleague, Xaver Küng, combined their love of metal and the strong belief that «aluminum is the material of the future.» A new shape, still typical of today's bottles, was developed, and **the quality achieved was superior.**

«The Original Swiss Bottle» demonstrates **worldwide quality** and offers an **array of characteristics** that exceed excellence. The aluminum bottles are **stable and lightweight**, produced from a single component that is **seamless and has no comparable weak points.**

Due to its **special internal coating**, it is **neutral to the taste, resistant to fruit acids and isotonic drinks**, and it will never flake even if dented on the outside. SIGG bottles appeal to everyone from kindergarteners to active outdoor enthusiasts to world-class celebrities. **Our collections are creative and exciting**, as SIGG sets the **trend for a chic reusable bottle.**

THE ADVANTAGES OF A SIGG BOTTLE

For the benefit of corporate business, SIGG specifically prepared a range of marketable products with your own corporate logo or your individual design.

The advantages are obvious:

Swiss Quality – Swiss Made

SIGG has over 100 years of experience, much more than any competitor. Additionally, SIGG brand products are engineered & manufactured in Switzerland, a country known & respected for exceptional quality. SIGG bottles are considered extremely functional: durable, leak-proof & long-lasting. SIGG's special eco-care bottle liner is made from ingredients that are BPA- and phthalate-free. No taste or smell transfer, no leaching. Do you like premium products with a very long lifespan?

International Design & Lifestyle

Every year, SIGG introduces a stylish new collection of bottle designs from independent artists worldwide, aligned with the latest color and pattern trends. Additionally, SIGG launches special collections and new innovative products as well as special fashion-oriented promotions. Which SIGG design can we produce for you to carry your message?

Eco-sensibility – Reduce Reuse Recycle

Billions of disposable plastic bottles are thrown into landfills every year. SIGG bottles, designed to be reusable, are made from aluminum, the world's most «recycling-friendly» material. SIGG bottles are produced in Switzerland, a country that has a reputation as one of the most eco-minded countries on Earth. Like to make a statement? – Provide your staff and customers with a reusable SIGG.
